

Assignment-14

1. Write a Java program to create an ArrayList. The program should be able to replace a specified element with a new value.
2. Write a Java program to create two linked lists containing different colors (as strings) and compare the two linked lists to check whether both contain the same elements or not.
3. Write a Java program to retrieve and remove the element of a tree set which are less than a specified value.
4. Using Stack write a Java program to reverse the words of a sentence.
5. Write a Java program to get the portion of a map whose keys range from a given key to another key.
6. Write a Java program to compare two HashSets and using the common elements create a TreeSet.
